

HOW TO USE DENTAL DATA CALENDAR YEAR 2021 EMERGENCY ROOM AND HOSPITALIZATIONS

There are two major files with 3 individual tables each for hospital Emergency Room Visits and actual hospitalizations because the dental infection was life threatening. The real power of the tables is that one can obtain county level data.

Emergency Department (ED) Visits- Note these are Non-Traumatic or Preventable Dental Conditions only.

1. Age Groups of 0-5, 6-20 and 20+ are presented in one set of tables.
2. There are tables showing dental ED visits by payor source. The payor sources are broken out by Medicare, Medicaid, Commercial Insurance, Self-Pay and All Others. All Others include Workers Compensation, Tricare or Other Federal Government, VA, Other/State Local Government, Other, Non-payment, Kidcare and Commercial Liability Coverage.
3. The last set of tables are broken out by the following race and gender: white females, white males, black females, black males, other females and other males.

Inpatient Hospitalizations- Note these are Non-Traumatic or Preventable Dental Conditions only.

1. Age Groups of 0-5, 6-20 and 20+ are presented in one set of tables. There are tables showing dental hospitalizations by payor source.
2. The payor sources are broken out by Medicare, Medicaid, Commercial Insurance, Self-Pay and All Others. All Others include Workers Compensation, Tricare or Other Federal Government, VA, Other/State Local Government, Other, Non-payment, Kidcare and Commercial Liability Coverage.
3. The last set of tables are broken out by the following race and gender: white females, white males, black females, black males, other females and other males.

Section 2 of both files will be most useful showing the numbers of cases and the hospital billings. Remember, most of this is all wasted money as the only treatment that occurs in the hospital is antibiotics and pain medication and the patient is referred to a dentist for definitive treatment. If they could not find a dentist on the day they went to hospital, they will not be able to afford a dentist the next day.

Emergency Department (ED) Visits

Data is presented in three different tables for each county as well as Florida. Age Groups of 0-5, 6-20 and 20+ are presented in one set of tables. There are tables showing dental ED visits by payor source. The payor sources are broken out by Medicare, Medicaid, Commercial Insurance, Self Pay and All Others. All Others include Workers Compensation, Tricare or Other Federal Government, VA, Other/State Local Government, Other, Non-payment, Kidcare and Commercial Liability Coverage. The last set of tables are broken out by the following race and gender: white females, white males, black females, black males, other females and other males.

Inpatient Hospitalizations

Data is presented in three different tables for each county as well as Florida. Age Groups of 0-5, 6-20 and 20+ are presented in one set of tables. There are tables showing dental hospitalizations by payor source. The payor sources are broken out by Medicare, Medicaid, Commercial Insurance, Self Pay and All Others. All Others include Workers Compensation, Tricare or Other Federal Government, VA, Other/State Local Government, Other, Non-payment, Kidcare and Commercial Liability Coverage. The last set of tables are broken out by the following race and gender: white females, white males, black females, black males, other females and other males.
